OBJECTIVE

B.Tech Data Science graduate (2026) with hands-on experience in Python, Django, and SQL through backend development projects and technical training. Passionate about solving real-world problems, building reliable software solutions, and continuously learning modern technologies.

EDUCATION

Bachelor of Technology in Data Science

Sri Venkateswara College of Engineering (SVCE), Tirupati

Graduated: 2026

SKILLS

Programming Languages	Python, SQL
Computer Science Concepts	Object-Oriented Programming (OOP)
Python Libraries	NumPy, Pandas
Backend Framework	Django(Basics)
Databases	MySQL

EXPERIENCE

Data Analytics Intern

Oct 2024 – Dec 2024

Infosys Springboard

- Developed interactive Power BI dashboards to analyze sales performance, tracking **1.17M** revenue and **205K** profit using DAX measures and KPI visualizations.
- Analyzed sales data and identified that the **Online** sales channel contributed approximately **41%** of total sales, making it the highest-performing channel.
- Created interactive reports and visualizations to support business performance analysis and data-driven decision-making.

PROJECTS

SkillSphere – Skill Sharing Platform

Python, Django, SQLite

- Developed backend modules for a web-based skill-sharing platform using Django, implementing user authentication (Admin/User), role-based access control, and profile management.
- Implemented CRUD operations and database interactions using Django ORM for user profiles and community features.
- Built a skill-based user search module using Django ORM, enabling users to discover others based on skills, interests, location, and profile information.

CERTIFICATIONS

- Introduction to Programming with Python – edX
- Introduction to SQL – IBM

ACHIEVEMENTS & LEADERSHIP

- Served as Technical Leader at Data Nexus (College Data Science Club), conducting technical sessions and supporting peer-learning initiatives.
